

Pharmaceutical Leader For Innovative Injectables

About Us

Sterile Injectable Drug Product Manufacturing

Advanced Pharmaceutical Factory(APF) is an institution based on 25 years of manufacturing excellence and achievement. We are an Injectable Drug Product facility, based in Riyadh City Saudi Arabia. Our facility is GMP qualified for sterile liquid dosage forms for injectable use, with specialized expertise in Terminal Sterilization, Sterile Emulsion, and Aseptic Fill & Finish. Organized under the Injectables Technology Platform.

APF is Researches-Driven, committed to be a reliable and consistent supplier of safe, effective, and affordable generic pharmaceuticals.

Mission

We aim to develop and successfully manufacture pharmaceutical products to prevent, alleviate and cure diseases.

Vision

Our vision is to be a leading pharmaceutical company in Saudi Arabia & Middle East and to become a significant regional player by providing high quality, affordable and innovative solutions in our field.

PEOPLE

Be a great place to work where people are inspired to be the best they can be.

PORTFOLIO

Bring to the world a portfolio of quality brands that anticipate and satisfy people's desires and needs.

PLANET

Be a responsible company that makes a difference by helping build and support sustainable communities.

PARTNERS

Nurture a winning network of customers and suppliers, together we create mutual, enduring value

PRODUCTIVITY

Be a highly effective, lean and fast moving organization

Quality Control

At APF, We commit ourselves to the continual improvement of Quality of our products, processes and systems in order to meet the enhanced and changing needs of customers. We offer high quality products that exceed our customer expectations. All our products are manufactured in GMP Certified Facilities. Keeping quality as a measuring unit of performance, our entire organization is designed to facilitate highest quality measures and maintain quality controls at all times

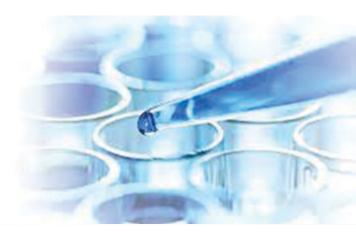

Products Catagory

IV Solution, TPN & Electrolyts Solutions

- ♦ Dextrose 5% Solution
- ♦ Dextrose 5% and Sodium Chloride 0.9%
- Dextrose 10% and Sodium Chloride 0.225%
- Sodium Chloride 0.9% Infusion

- Ringer Lactate Solution
- Ringer Solution
- ♦ 6% Hydroxyethyl Starch
- Potassium Chloride Injection

Antibiotics & Anti-Fungal

- Levofloxacin Injection
- Moxifloxacin Injection
- Ciprofloxacin Injection
- Metronidazole Injection
- Flucytosine Injection

Analgesics

Paracetamol Injection

Cardiovascular

- Dopamine Hydrochloride Injection
- Dopamine 5% Dextrose

Local Anesthesia

Lidocane 1%

Psychiatry

Midazolam

Production Capacity

APF Facility mostly towards production processes and plants aimed at the manufacture of sterile liquid drugs. The principal behind our correct and exceptional designs is attributable to our extended knowledge of the production processes of such drugs, due to almost 25 years of experience in international settings and an excellent 100% made in manufacture. The application of a suitable and complete analysis of our technologies begins in from a clear definition: it includes a prompt evaluation and a careful monitoring of all the critical parameters that could directly influence the quality of the end-product. This way, we ensure a complete quality control, both within and between our production lines. Each process follows the rigorous requirements dictated by cGMP (current Good Manufacturing Practice), which have now been adopted as one of our work guidelines.

Production Facility Equipments

Researches And Developments

Injectable Product Development Process

Research and development (R&D) include activities that undertake to innovate and introduce new products and services. It is often the first stage in the development process. The goal is typically to take new products and services to market and add to the company's bottom line.

Contract Manufacturing Services Program

Dedicated team going to serve you

Together with a worldwide network of partners, we offer you individual support in the area of contract manufacturing. Whether you are looking for standardized or customer-specific product solutions that are to be partially or completely outsourced we work closely together to develop needs-based solutions for a wide variety of demands.

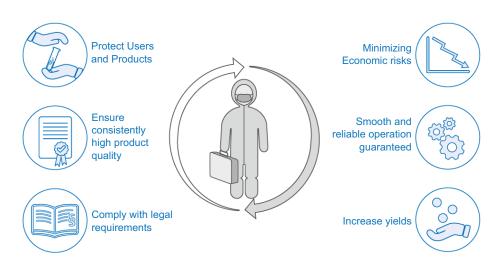

Clean Rooms

CERTIFIED FACILITY UTILIZED AS A PART OF OUR SPECIALIZED INDUSTRIAL PRODUCTION & RESEARCH.

Including the manufacture of pharmaceutical items, Clean rooms are designed to maintain extremely low levels of particulate, such as dust, airborne organisms, or vaporized particles. Clean rooms typically have a cleanliness level quantified by the number of particles per cubic meter at a predetermined molecule measure. The ambient outdoor air in a typical urban area contains 35,000,000 particles for each cubic meter in the size range 0.5 μ m and bigger in measurement, equivalent to an ISO 9 clean room, while by comparison an that size range and just 12 particles for each cubic meter of 0.3 μ m and smaller.

Certificates

- Saudi Food and Drugs Authority
- GMP Saudi FDA Certificated (Advanced Pharmaceutical Factory)
- ISO Certificated

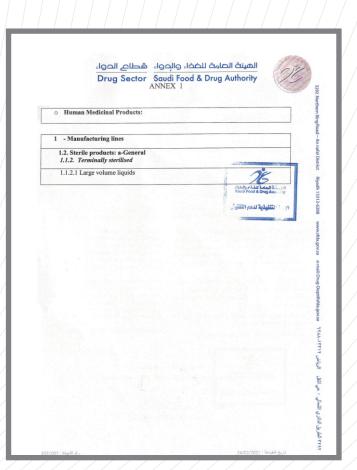

Certificates

Branches

- Riyadh
